Rick Perry Most Visible Among GOP Contenders

9/11 Commemorations Capture Public Attention

The 10th anniversary of the Sept. 11 terror attacks topped the public's news interest last week, but Americans also continued to closely track news about the nation's struggling economy.

About a quarter (27%) say they followed coverage of the solemn 9/11 anniversary more closely than any other news. Nearly as many (23%) say they followed news about the economy most closely. Another 13% cite President Obama's speech to Congress to unveil his jobs plan as their top story, according to the latest weekly News Interest Index survey, conducted Sept. 8-11 by the Pew Research Center for the People & the Press among 1,010 adults.

These two topics – the 9/11 anniversary and the economy's troubles – also topped media coverage. News about the anniversary and developments related to terror on the home front together accounted for 18% of coverage, according to the Pew Research Center's Project for Excellence in Journalism (PEJ). News about the economy made up a total of

News Interest vs. News Coverage

	News Interest	News Coverage
9/11 anniversary	27	18
Economy	23	9
Obama's jobs speech	13	19
Texas wildfires	10	3
2012 elections	7	15
U.S. Postal Service	3	1

News interest shows the percentage of people who say they followed this story most closely, Pew Research Center for the People & the Press, Sept. 8-11, 2011. News coverage shows the percentage of news coverage devoted to each story, Pew Research Center's Project for Excellence in Journalism, Sept. 5-11, 2011.

28% of the newshole. About two thirds of that (19% of all coverage) focused on Obama's Sept. 8 jobs speech, while 9% focused on economic news more generally.

Most Americans (60%) say that news organizations gave the right amount of coverage to the Sept. 11 anniversary. Fewer (44%) say this about coverage of the early stages of the 2012 presidential campaign.

With Rick Perry quickly attaining front-runner status since jumping into the race last month, 31% say the Texas governor is the possible Republican candidate they have heard about most in the news recently. No one else comes close: 12% say that candidate is former Massachusetts Gov. Mitt Romney while 7% say it is Rep. Michele Bachmann of Minnesota. In mid-August, Americans were about equally likely to say they had heard the most about Perry or Bachmann.

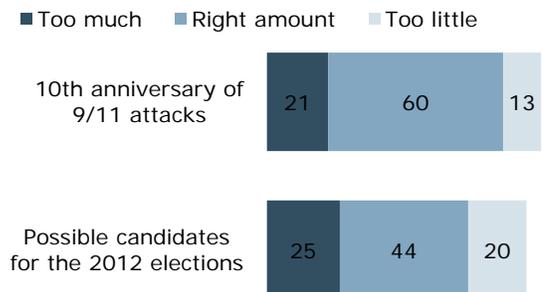

Right Amount of 9/11 Coverage?

Four-in-ten (42%) say they very closely followed news about the 10th anniversary of the Sept. 11 terror attacks. That is more than said they followed news about the 9/11 anniversary in 2010 very closely (33%) and comparable to the 39% that followed the first anniversary of 9/11 in 2002 very closely. Differences among partisan and demographic groups are generally small.

Among those reached on Sunday, Sept. 11, nearly half (48%) say they followed news about the anniversary very closely. For the three days leading up to the commemoration events, 38% say they followed 9/11 news very closely.

Most Americans (60%) say news organizations have given the anniversary the right amount of coverage; 21% say it received too much coverage and 13% say it received too little. In 2002, just before the first anniversary of 9/11 56% said the anniversary received the right amount of coverage, while 35% thought there was too much coverage. At that point, just 3% said the events commemorating 9/11 received too little coverage.

Most See Amount of 9/11 Coverage as Right

PEW RESEARCH CENTER. Sept. 8-11, 2011. Don't know responses not shown.

A plurality (44%) continues to say that news organizations are giving the right amount of coverage to possible candidates for the 2012 election; 25% say the presidential campaign has gotten too much coverage while 20% say it has gotten too little coverage.

Differences among partisans are relatively narrow, though Republican (56%) are more likely than Democrats (45%) or independents (39%) to say news organizations are giving the candidates the right amount of coverage.

Perry Getting Most Attention

Three-in-ten (31%) name Perry when asked which GOP candidate they have heard the most about in the news recently. That is much higher than the percentages naming Romney (12%) or Bachmann (7%). The survey was completed before Monday's GOP debate in Tampa.

In mid-August – with Bachmann coming off a win in the Iowa straw poll and Perry joining the race – about as many said they had heard the most about Bachmann (23%) as Perry (22%). Since then, Bachmann's visibility has dropped sharply.

Perry Most Visible in 2012 Republican Field

GOP candidate heard most about?	General Public			Republicans and Republican-leaners		
	July 21-24	Aug 18-21	Sep 8-11	July 21-24	Aug 18-21	Sep 8-11

	100	100	100	100	100	100
N	999	1,007	1,010	395	365	408

PEW RESEARCH CENTER Sep. 8-11, 2011. Other category from previous surveys not shown because of changes in candidates mentioned. Figures may not add to 100% because of rounding and changes in "other" category.

Among Republicans and Republican-leaning independents, 44% say they are hearing the most about Perry, while just 11% say this about Romney. Fewer than one-in-ten Republicans and GOP leaners say they have heard the most about Bachmann. Among those in the general public following the early stages of the 2012 campaign very closely, nearly half (48%) say they have heard the most about Perry; 14% name Romney and 6% name Bachmann.

The Week's News

While 42% say they followed news about the Sept. 11 anniversary very closely last week, a comparable 40% say they followed news about the economy very closely. The number tracking economic news very closely is little changed from recent weeks. Republicans, Democrats and independents are about equally likely to say they are tracking economic news very closely.

Overall, 28% say they followed news about the speech to Congress very closely; 13% say this was the news they followed most closely. More than four-in-ten Democrats (43%) say they followed this news very closely, compared with 16% of Republicans and 26% of independents.

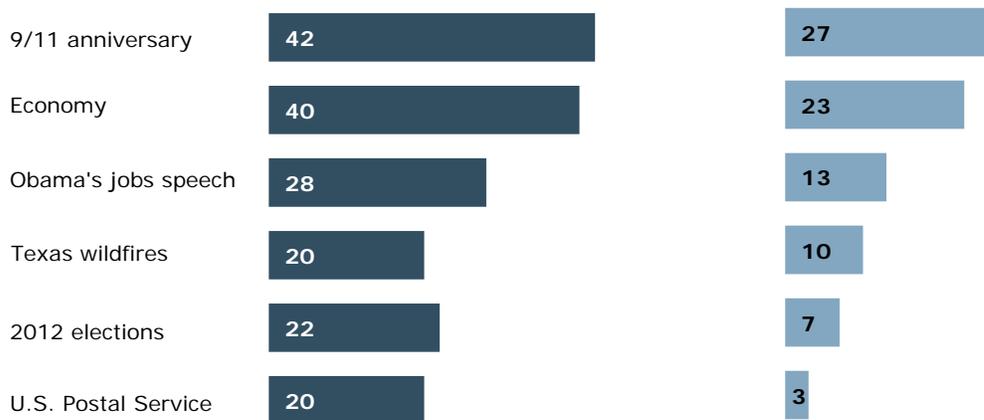

Two-in-ten (20%) say they followed news about the destructive Texas wildfires very closely; 10% say this was the news they followed most closely. Not surprisingly, more people in the South followed this news very closely (28%) than those in any other region.

About two-in-ten (22%) say they followed news about the 2012 elections very closely; 7% say this was their top story. The number following very closely is unchanged from the previous week. Though much of the coverage at this point is about the Republican candidates, partisans are about equally likely to say they followed candidate news very closely (25% of Republicans, 21% of Democrats and 22% of independents).

News Interest

% following each story very closely

Which one story did you follow most closely?

PEW RESEARCH CENTER Sept. 8-11, 2011.

Two-in-ten (20%) say they followed news about the serious financial problems facing the U.S. Postal Service. Just 3% say this was the news they followed most closely. News about the Postal Service – and the possibility of deep cuts in its operations – made up 1% of coverage, according to PEJ.

These findings are based on the most recent installment of the weekly News Interest Index, an ongoing project of the Pew Research Center for the People & the Press. The index, building on the Center's longstanding research into public attentiveness to major news stories, examines news interest as it relates to the news media's coverage. The weekly survey is conducted in conjunction with The Project for Excellence in Journalism's News Coverage Index, which monitors the news reported by major newspaper, television, radio and online news outlets on an ongoing basis. In the most recent week, data relating to news coverage were collected Sept. 5-11, and survey data measuring public interest in the top news stories of the week were collected Sept. 8-11 from a nationally representative sample of 1,010 adults.

About the News Interest Index

The *News Interest Index* is a weekly survey conducted by the Pew Research Center for the People & the Press aimed at gauging the public's interest in and reaction to major news events. This project has been undertaken in conjunction with the Project for Excellence in Journalism's *News Coverage Index*, an ongoing content analysis of the news. The News Coverage Index catalogues the news from top news organizations across five major sectors of the media: newspapers, network television, cable television, radio and the internet. Each week (from Monday through Sunday) PEJ compiles this data to identify the top stories for the week. (For more information about the Project for Excellence in Journalism's News Coverage Index, go to www.journalism.org.) The News Interest Index survey collects data from Thursday through Sunday to gauge public interest in the most covered stories of the week.

Results for this survey are based on telephone interviews conducted Sept. 8-11, 2011, among a national sample of 1,010 adults 18 years of age or older living in the continental United States (608 respondents were interviewed on a landline telephone, and 402 were interviewed on a cell phone, including 192 who had no landline telephone). The survey was conducted by interviewers at Princeton Data Source under the direction of Princeton Survey Research Associates International. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International. Interviews were conducted in English. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older.

The combined landline and cell phone sample are weighted using an iterative technique that matches gender, age, education, race, Hispanic origin, region, and population density to parameters from the March 2010 Census Bureau's Current Population Survey. The sample is also weighted to match current patterns of telephone status based on extrapolations from the 2010 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size within the landline sample. Sampling errors and statistical tests of significance take into account the effect of weighting. The following table shows the sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Group	Sample Size	Plus or minus ...
Total sample	1,010	4.0 percentage points
Republicans	277	7.5 percentage points
Democrats	279	7.5 percentage points
Independents	358	6.5 percentage points
Republicans and Rep-leaning independents	408	6.0 percentage points

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

January 4-7, 2008	40	11	43	6
December 14-17, 2007	32	16	48	4
November 16-19, 2007	32	13	51	4
July 20-23, 2007	32	18	43	7
June 1-4, 2007	33	12	47	8

² From January 4-7, 2008 through January 11-14, 2008 the question was asked as a standalone item and was worded: "Thinking about the presidential campaign... Do you think news organizations are giving too much, too little or the right amount of coverage to the campaign?"

ASK ALL:

PEW.4 Thinking about possible Republican candidates for president in 2012... Regardless of whom you might prefer, which Republican candidate have you heard the most about in the news recently?
[OPEN END. RECORD FIRST MENTION ONLY.] [PLEASE BE CERTAIN TO DISTINGUISH BETWEEN "JOHN MCCAIN" AND "HERMAN CAIN".]
