

Nationalities by regional classification for unauthorized immigrants in EU-EFTA countries

Five regions for the nationality of unauthorized immigrants are used in this report. They come from two different data sources: (1) labor force surveys and (2) asylum seeker data for those with pending decisions. A single asterisk (*) indicates a country or territory that appears in the country list of regions coded in labor force surveys, but not in the country list of asylum seekers with a pending decision. A double asterisk (**) indicates a country or territory appears in the country list of asylum seekers with a pending decision but was not part of the country list for regions coded in labor force surveys. Note that some countries in the code lists have no asylum seekers or respondents in the labor force surveys for 2014 through 2017. Also, asylum seekers with unknown or no nationality (stateless) were considered to have an unknown nationality.

Americas

Antigua and Barbuda	French Southern Territories	Turks and Caicos Islands*
Anguilla*	Grenada	United States

Zimbabwe

Nationalities by regional classification for unauthorized immigrants in the United States

Source data of countries and territories from the American Community Survey (ACS). Some country names are no longer used but are stated by respondents as their nationality. Some stated nationalities are subregions within countries. Some of the listed countries have no respondents coded as unauthorized immigrants in the ACS.
