## Social Networking Popular Across Globe

### Arab Publics Most Likely to Express Political Views Online

Social networking has spread around the world with remarkable speed. In countries such as Britain, the United States, Russia, the Czech Republic and Spain, about half of all adults now use Facebook and similar websites. These sites are also popular in many lower-income nations, where, once people have access to the internet, they tend to use it for social networking.

Meanwhile, cell phones have become nearly ubiquitous throughout much of the world, and people are using them in a variety of ways, including texting and taking pictures. Smart phones are also increasingly common – roughly half in Britain, the U.S., and Japan have one. Globally, most smart phone users say they visit social networking sites on their phone, while many get job, consumer, and political information.

Technologies like these are especially popular among the young and well educated. In almost every country polled, people under age 30 and those with a college education are more likely to engage in social networking and to use a smart phone.

These are among the key findings from a 21-nation survey conducted by the Pew Research Center's Global Attitudes Project from March 17-April 20. The survey also finds that global

#### Do You Use Social Networking Sites?

	■ Yes	■ No	No internet*
Britain	52	33	15
U.S.	50	29	21
Russia	50	9	42
Czech Rep.	49	30	22

PEW RESEARCH CENTER Q77 & Q79.

publics are sharing their views online about a variety of topics, especially popular culture. Across 20 of the nations polled (Pakistan is excluded from this calculation due to the small number of social networking users), a median of 67% of social networkers say they use these sites to share opinions about music and movies. Significant numbers also post their views on community issues, sports and politics. Fewer give their opinions about religion.

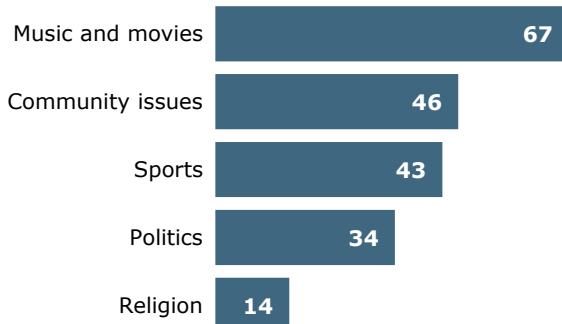

Expressing opinions about politics, community issues and religion is particularly common in the Arab world. For instance, in Egypt and Tunisia, two nations at the heart of the Arab Spring, more than six-in-ten social networkers share their views about politics online. In contrast, across 20 of the nations surveyed, a median of only 34% post their political opinions.

Similarly, in Egypt, Tunisia, Lebanon and Jordan, more than seven-in-ten share views on community issues, compared with a cross-national median of just 46%.

There is considerable interest in social networking in low- and middle-income nations. Once people in these countries are online, they generally become involved in social networks at high rates. For instance, the vast majority of internet users in Mexico, Brazil, Tunisia, Jordan, Egypt, Turkey, Russia and India are using social networking sites.

## Social Networking: Sharing Views on Music and Movies Most Popular

*Do you ever use social networking sites to share your views about...?*

PEW RESEARCH CENTER Q79 & Q80b-d.

Conversely, publics in some more economically developed nations seem less enthusiastic about interacting with others online – especially Japan and Germany, the only two countries where less than half of all internet users participate in social networks. And those Japanese and Germans who do go online for social networking use it less often than others around the world to express thoughts on culture, community, sports, politics and religion.

## Social Networking

In 19 of 21 countries, about three-in-ten or more of those polled use sites such as Facebook, including about half in Britain (52%), the U.S. (50%), Russia (50%), Spain (49%), and the Czech Republic (49%). Only in India (6%) and Pakistan (4%) is the percentage of adults who use social networking sites in single digits.<sup>1</sup>

In every country polled, use of social networking sites varies by age. In 17 of 21 countries, there is a gap of 50 points or more in usage of social networking sites between those younger than 30 and those 50 or older. This gap is particularly pronounced in Italy, Poland, Britain and Greece, where at least 70 percentage points separate those in the younger group from those in the older group.

Similarly, use of social networking sites varies by education level, with double-digit differences between those with a college degree and those without a college degree in 15 of 18 countries (this finding excludes Mexico, Brazil and Pakistan, where fewer than 100 respondents have a college degree). The widest gap is found in Egypt, where 81% of those with a college degree use social networking sites, compared with just 18% of those with less education.

### Young Much More Likely to Use Social Networking

PEW RESEARCH CENTER Q79.

<sup>1</sup> Respondents in each country were given examples of popular social networking sites in their country; see the appendix at the end of the topline section of this report for details.

Among those who participate in social networks, sharing views about music and movies is a popular activity; majorities in 17 countries say they have done this. In China (86%), India (85%), Mexico (84%), Greece (83%), Turkey (78%), Tunisia (77%) and Italy (75%), at least three-quarters have shared their views about music and movies. Sports, on the other hand, is a less common topic, with half or more of users of social networking sites in only seven countries – India, Jordan, Tunisia, Turkey, Egypt, Brazil and China – saying they have shared their opinions about sports.

PEW RESEARCH CENTER Q79 & Q80a-e.

In Arab countries such as Tunisia, Lebanon, Jordan and Egypt, social networking sites are also a popular forum for expressing views on politics and community issues. More than seven-in-ten users of social networking sites in these countries have posted about community issues on these sites, and at least six-in-ten have shared their views about politics. Italy and Turkey are

the only other countries surveyed where majorities of those who use social networking sites have expressed opinions about community issues (64% and 63%, respectively); most in Turkey also have shared their views on politics on these sites (57%).

Users of social networking in Tunisia (63%), Egypt (63%) and Jordan (62%) are also more likely than those in other countries to say they have posted on religion. In fact, in no other nation surveyed has a majority of users of these sites shared views about religion. In 14 countries, only about a third or less have posted on this topic.

## Cell Phones Nearly Universal in Much of World

Broad majorities around the world own a cell phone.

Three-quarters or more in 18 of the 21 countries surveyed say they have a mobile phone, while at least half say the same in Mexico (63%), India (56%) and Pakistan (52%).

In addition to making phone calls, most respondents say they regularly use their cell phone to send text messages. At least two-thirds of cell-phone owners in 17 countries say they frequently text, including 93% in Mexico and 90% in Lebanon. Turks (60%), Germans (58%), Indians (42%) and Pakistanis (36%) are less likely to send text messages.

Taking pictures or videos with cell phones is somewhat

PEW RESEARCH CENTER Q78 & Q81a-d.

less popular. The Japanese (79%), Mexicans (70%), Americans (67%) and Spanish (67%) are the most likely to regularly use their phones to take a picture or video, while roughly six-in-ten or fewer say the same in the other 17 countries surveyed. Pakistanis (13%) are the least likely to use their mobile phones for such a purpose.

Few cell phone users access the internet on their phones. In 18 of the countries surveyed, fewer than four-in-ten say they regularly use their mobile phone to access the internet. The British (52%), Japanese (51%) and Americans (51%) are most likely to do so.

## Smart Phone Users Engaged on Social Networks

Among smart phone users – defined here as those who own a cell phone and regularly use it to access the internet – social networking is very popular.

In 12 countries, at least six-in-ten smart phone users access social networks with their phones. The practice is particularly common in Egypt (79%), Mexico (74%) and Greece (72%). The Japanese (45%) and Chinese (31%), on the other hand, are the least likely to use their phones for connecting with social networks.

### Smart Phone Users

	<i>On your cell phone, do you regularly...</i>

Pakistan not shown due to sample size.

PEW RESEARCH CENTER Q81e-h.

Respondents in the U.S., Japan and Europe are most likely to use their smart phones to get information about consumer products, their job or politics. At least four-in-ten in these countries say they use their phone regularly to get information about prices and availability of products or about issues related to their job. And more than a third say the same about accessing political news and information.

Overall, smart phone users in the countries surveyed in the Middle East, Asia and Latin America are less likely to use their phones to gather information, although there are a few exceptions. A majority of smart phone users in India (60%), for example, rely on their mobile phones for information about their job. Egyptians (65%) are particularly likely to search for political news on their cell phones. And the Chinese (48%) are more likely to use their mobile phones to access information about politics than any of the other smart phone activities asked about.

The young are considerably more engaged with their cell phones than their elders. There are double-digit age gaps in most countries for all cell phone activities except making calls. For example, in 19 of the 21 countries surveyed, 18-29 year olds are at least 10 percentage points more likely than those age 50 or older to use their cell phone to access the internet. The biggest differences occur in China (+63 points), Japan (+62), Russia (+62) and Britain (+61).

The way people use their cell phones also varies considerably by education. For example, in 14 countries, respondents with a college education are at least 10 percentage points more likely than those without a college degree to access the internet on their mobile phones. The education gap is particularly large in China (+47), Turkey (+36), Egypt (+32) and Lebanon (+31).

### Smart Phones More Common Among Young People

## About the Pew Global Attitudes Project

The *Pew Research Center's Global Attitudes Project* conducts public opinion surveys around the world on a broad array of subjects ranging from people's assessments of their own lives to their views about the current state of the world and important issues of the day. The project is directed by Andrew Kohut, president of the Pew Research Center, a nonpartisan "fact tank" in Washington, DC, that provides information on the issues, attitudes, and trends shaping America and the world. The *Pew Global Attitudes Project* is principally funded by The Pew Charitable Trusts.

Since its inception in 2001, the *Pew Global Attitudes Project* has released numerous major reports, analyses, and other releases, on topics including attitudes toward the U.S. and American foreign policy, globalization, terrorism, and democracy.

*Pew Global Attitudes Project* team members include Richard Wike (Associate Director), Juliana Menasce Horowitz, Katie Simmons, Jacob Poushter, and Cathy Barker. Other contributors to the project include Pew Research Center staff members James Bell (Director, International Survey Research), Bruce Stokes (Director, Pew Global Economic Attitudes), and Elizabeth Mueller Gross (Vice President), as well as Bruce Drake, Neha Sahgal, Carroll Doherty, and Michael Dimock. Additional members of the team include Mary McIntosh, president of Princeton Survey Research Associates International, and Mike Mokrzycki. The *Pew Global Attitudes Project* team regularly consults with survey and policy experts, regional and academic experts, journalists, and policymakers whose expertise provides tremendous guidance in shaping the surveys.

The *Pew Global Attitudes Project*'s co-chairs are on leave through 2012. The project is co-chaired by former U.S. Secretary of State Madeleine K. Albright, currently principal, the Albright Stonebridge Group, and by former Senator John C. Danforth, currently partner, Bryan Cave LLP.

All of the project's reports and commentaries are available at [www.pewglobal.org](http://www.pewglobal.org). The data are also made available on our website within two years of publication. Findings from the project are also analyzed in *America Against the World: How We Are Different and Why We Are Disliked* by Andrew Kohut and Bruce Stokes, published by Times Books. A paperback edition of the book was released in May 2007.

## **Survey Methods**

### About the 2012 Pew Global Attitudes Survey

Results for the survey are based on telephone and face-to-face interviews conducted under the direction of Princeton Survey Research Associates International. Survey results are based on national samples except in China. For further details on sample designs, see below.

The descriptions below show the margin of sampling error based on all interviews conducted in that country. For results based on the full sample in a given country, one can say with 95% confidence that the error attributable to sampling and other random effects is plus or minus the margin of error. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

**Country:** **Brazil**

Sample design: Multi-stage cluster sample stratified by Brazil's five regions and proportional to population size and urban/rural population

Mode: Face-to-face adults 18 plus

Languages: Portuguese

Fieldwork dates: March 20 – April 19, 2012

Sample size: 800

Margin of Error: ±5.1 percentage points

Representative: Adult population

**Country:** **Britain**

Sample design: Random Digit Dial (RDD) probability sample representative of all telephone households (roughly 98% of all British households)

Mode: Telephone adults 18 plus

Languages: English

Fieldwork dates: March 19 – April 15, 2012

Sample size: 1,018

Margin of Error: ±3.3 percentage points

Representative: Telephone households (including cell phone-only households)  
(roughly 98% of all British households)

Country:	<b>China</b>
Sample design:	Multi-stage cluster sample stratified by China's three regional-economic zones (which include all provinces except Tibet, Xinjiang, Hong Kong and Macao) with disproportional sampling of the urban population. Twelve cities, 12 towns and 12 villages were sampled covering central, east, and west China. The cities sampled were Beijing, Shanghai, Qingdao, Nanjing, Haikou, Qinhuangdao, Wuhan, Shangqui, Xiangtan, Neijiang, Guilin, Chongqing. The towns covered were Zhangjiagang, Suzhou, Jiangsu; Dashiqiao, Yingkou, Liaoning; Jimo, Qingdao, Shandong; Gaoan Yichun, Jiangxi; Dali, Dali State, Yunnan; Shaowu, Nanping, Fujian; Xintai, Taian, Shandong; Gaobeidian, Baoding, Hebei; Ji'an, Tonghua, Jilin; Zaoyang, Xiangyang, Hubei; Guiping, Guigang, Guangxi; Yicheng, Xiangyang, Hubei. Two or three villages near each of these towns were sampled.
Mode:	Face-to-face adults 18 plus
Languages:	Chinese (Mandarin, Hubei, Shandong, Chongqing, Hebei, Liaoning, Guangxi, Shanghai, Jilin, Jiangxi, Sichuan, Henan, Yunnan, Jiangsu, Hunan, and Hainan dialects)
Fieldwork dates:	March 18 – April 15, 2012
Sample size:	3,177
Margin of Error:	±4.3 percentage points
Representative:	Disproportionately urban (the sample is 55% urban, China's population is 50% urban). The sample represents roughly 64% of the adult population.
Note:	Data cited are from the Horizon Consultancy Group.

Country:	<b>Czech Republic</b>
Sample design:	Random Digit Dial (RDD) sample representative of all adults who own a cell phone (roughly 91% of adults age 18 and older)
Mode:	Telephone adults 18 plus
Languages:	Czech
Fieldwork dates:	March 17 – April 2, 2012
Sample size:	1,000
Margin of Error:	±3.4 percentage points
Representative:	Adults who own a cell phone (roughly 91% of adults age 18 and older)

Country:

**Egypt**

Sample design:

Multi-stage cluster sample stratified by governorates (excluding Frontier governorates for security reasons – about 2% of the population) proportional to population size and urban/rural population

Mode:

Face-to-face adults 18 plus

Languages:

Arabic

Fieldwork dates:

March 19 – April 10, 2012

Sample size:

1,000

Margin of Error:

±4.2 percentage points

Representative:

Adult population (excluding Frontier governorates or about 2% of the population)

Country:

**France**

Sample design:

Random Digit Dial (RDD) sample representative of all telephone households (roughly 99% of all French households) with quotas for gender, age and occupation and proportional to region size and urban/rural population

Mode:

Telephone adults 18 plus

Languages:

French

Fieldwork dates:

March 20 – March 31, 2012

Sample size:

1,004

Margin of Error:

±3.5 percentage points

Representative:

Telephone households (including cell phone-only households) (roughly 99% of all French households)

Country:

**Germany**

Sample design:

Random Last Two Digit Dial (RL(2)D) probability sample representative all landline telephone households (roughly 91% of all German households) stratified by administrative districts proportional to population size and community size

Mode:

Telephone adults 18 plus

Languages:

German

Fieldwork dates:

March 19 – April 2, 2012

Sample size:

1,000

Margin of Error:

±4.0 percentage points

Representative:

Telephone households (excluding cell phone-only households [8%] and households without telephones [1%])

Country:

**Greece**

Sample design:

Multi-stage cluster sample stratified by region and proportional to population size and urban/rural population excluding the islands in the Aegean and Ionian Seas (roughly 6% of the population)

Mode:

Face-to-face adults 18 plus

Languages:

Greek

Fieldwork dates:

March 20 – April 9, 2012

Sample size:

1,000

Margin of Error:

±3.7 percentage points

Representative:

Adult population (excluding the islands in the Aegean and Ionian Seas – roughly 6% of the population)

Country:

**India**

Sample design:

Multi-stage cluster sample in 13 of the 15 most populous states (Kerala and Assam were excluded), plus the Union Territory of Delhi (86% of the adult population); disproportional sampling of the urban population (sample 50% urban/population 28% urban)

Mode:

Face-to-face adults 18 plus

Languages:

Hindi, Bengali, Tamil, Kannad, Telugu, Gujarati, Marathi, Oriya

Fieldwork dates:

March 19 – April 19, 2012

Sample size:

4,018

Margin of Error:

±3.9 percentage points

Representative:

Disproportionately urban. The data was weighted to reflect the actual urban/rural distribution in India. Sample covers roughly 86% of the Indian population.

Country:

**Italy**

Sample design:

Multi-stage cluster sample stratified by four regions and proportional to population size and urban/rural population

Mode:

Face-to-face adults 18 plus

Languages:

Italian

Fieldwork dates:

March 19 – April 10, 2012

Sample size:

1,074

Margin of Error:

±4.4 percentage points

Representative:

Adult population

Country:	<b>Japan</b>
Sample design:	Random Digit Dial (RDD) probability sample representative of all landline telephone households stratified by region and population size
Mode:	Telephone adults 18 plus
Languages:	Japanese
Fieldwork dates:	March 20 – April 12, 2012
Sample size:	700
Margin of Error:	±4.1 percentage points
Representative:	Telephone households (excluding cell phone-only households [roughly 9%] and households with no telephones [roughly 5%])
Country:	<b>Jordan</b>
Sample design:	Multi-stage cluster sample stratified by region and Jordan's 12 governorates and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Arabic
Fieldwork dates:	March 19 – April 10, 2012
Sample size:	1,000
Margin of Error:	±4.8 percentage points
Representative:	Adult population
Country:	<b>Lebanon</b>
Sample design:	Multi-stage cluster sample stratified by Lebanon's seven major regions (excluding a small area in Beirut controlled by a militia group and a few villages in the south Lebanon, which border Israel and are inaccessible to outsiders) and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Arabic
Fieldwork dates:	March 19 – April 10, 2012
Sample size:	1,000
Margin of Error:	±4.2 percentage points
Representative:	Adult population

Country:	<b>Mexico</b>
Sample design:	Multi-stage cluster sample stratified by region and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Spanish
Fieldwork dates:	March 20 – April 2, 2012
Sample size:	1,200
Margin of Error:	±3.8 percentage points
Representative:	Adult population
Country:	<b>Pakistan</b>
Sample design:	Multi-stage cluster sample of all four provinces stratified by province and the urban/rural population. (The Federally Administered Tribal Areas, Gilgit-Baltistan, Azad Jammu and Kashmir were excluded for security reasons, as were areas of instability in Baluchistan and Khyber Pakhtunkhwa [formerly the North-West Frontier Province] – roughly 18% of the population.)
Mode:	Face-to-face adults 18 plus
Languages:	Urdu, Pashto, Punjabi, Sindhi, Hindko, Saraiki, Brahvi, Balochi
Fieldwork dates:	March 28 – April 13, 2012
Sample size:	1,206
Margin of Error:	±4.2 percentage points
Representative:	Sample is disproportionately urban, but data are weighted to reflect the actual urban/rural distribution in Pakistan. Sample covers roughly 82% of the adult population.
Country:	<b>Poland</b>
Sample design:	Multi-stage cluster sample stratified by Poland's 16 provinces and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Polish
Fieldwork dates:	March 24 – April 16, 2012
Sample size:	1,001
Margin of Error:	±3.7 percentage points
Representative:	Adult population

Country: **Russia**  
Sample design Multi-stage cluster sample stratified by Russia's eight regions (excluding a few remote areas in the northern and eastern parts of the country and Chechnya) and proportional to population size and urban/rural population

Mode: Face-to-face adults 18 plus

Languages: Russian

Fieldwork dates: March 19 – April 4, 2012

Sample size: 1,000

Margin of Error: ±3.6 percentage points

Representative: Adult population

Country: **Spain**

Sample design Random Digit Dial (RDD) probability sample representative of telephone households (about 97% of Spanish households) stratified by region and proportional to population size

Mode: Telephone adults 18 plus

Languages: Spanish/Castilian

Fieldwork dates: March 20 – April 2, 2012

Sample size: 1,000

Margin of Error: ±3.2 percentage points

Representative: Telephone households (including cell phone-only households) (about 97% of Spanish households)

Country: **Tunisia**

Sample design Multi-stage cluster sample stratified by governorate and proportional to population size and urban/rural population

Mode: Face-to-face adults 18 plus

Languages: Tunisian Arabic

Fieldwork dates: March 22 – April 20, 2012

Sample size: 1,000

Margin of Error: ±3.9 percentage points

Representative: Adult population

Country:	<b>Turkey</b>
Sample design:	Multi-stage cluster sample in all 26 regions (based on geographical location and level of development [NUTS 2]) and proportional to population size and urban/rural population
Mode:	Face-to-face adults 18 plus
Languages:	Turkish
Fieldwork dates:	March 20 – April 11, 2012
Sample size:	1,001
Margin of Error:	±5.2 percentage points
Representative:	Adult population
Country:	<b>United States</b>
Sample design:	Random Digit Dial (RDD) probability sample representative of all telephone households stratified by county
Mode:	Telephone adults 18 plus
Languages:	English, Spanish
Fieldwork dates:	March 20 – April 4, 2012
Sample size:	1,011
Margin of Error:	±3.5 percentage points
Representative:	Telephone households (including cell phone-only households)

**Pew Global Attitudes Project**  
**2012 Spring Survey Topline Results**  
**December 12, 2012 Release**

Methodological notes:

- Survey results are based on national samples except in China. For further details on sample designs, see Survey Methods section.
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers.
- Since 2007, the Global Attitudes Project has used an automated process to generate toplines. As a result, numbers may differ slightly from those published prior to 2007.
- Spring, 2011 survey in Pakistan was fielded before the death of Osama bin Laden (April 10 – April 26), while the Late Spring, 2011 survey was conducted afterwards (May 8 – May 15).
- Trends from India prior to 2011 are not shown because those results were based on less-representative samples of the population. Since 2011, the samples have been more representative of the Indian population.
- Trends from Brazil prior to 2010 are not shown because those results were based on a less-representative sample of the population. Since 2010, the samples have been more representative of the Brazilian population.
- Trends from Egypt in 2002 are not shown because those results were based on a less-representative sample of the population. Since 2006, the samples have been more representative of the Egyptian population.
- Not all questions included in the Spring 2012 survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.
