RECOMMENDED CITATION
Pew Research Center, June, 2023, "Inflation,
Health Costs, Partisan Cooperation Among the
Nation's Top Problems"

## About Pew Research Center

Pew Research Center is a nonpartisan, nonadvocacy fact tank that informs the public about the issues, attitudes and trends shaping the world. It does not take policy positions. The Center conducts public opinion polling, demographic research, computational social science research and other data-driven research. It studies politics and policy; news habits and media; the internet and technology; religion; race and ethnicity; international affairs; social, demographic and economic trends; science; research methodology and data science; and immigration and migration. Pew Research Center is a subsidiary of The Pew Charitable Trusts, its primary funder.
© Pew Research Center 2023

## How we did this

Pew Research Center conducted this study to better understand Americans' views of the problems facing the country, Joe Biden's job performance and more. For this analysis, we surveyed 5,115 adults from June 5-11, 2023. Everyone who took part in this survey is a member of the Center's American Trends Panel (ATP), an online survey panel that is recruited through national, random sampling of residential addresses. This way nearly all U.S. adults have a chance of selection. The survey is weighted to be representative of the U.S. adult population by gender, race, ethnicity, partisan affiliation, education and other categories. Read more about the ATP's methodology.

Here are the questions used for the report and its methodology.

# Inflation, Health Costs, Partisan Cooperation Among the Nation's Top Problems 

## Democrats hold edge on many issues, but more Americans agree with Republicans on economy, crime, immigration

The public's list of the top problems facing the nation includes inflation, health care affordability, drug addiction and gun violence.

Yet the ability of Republicans and Democrats to work together rates about as high on the problems list as these other concerns. And it is one of the few, among 16 problems included, on which there is no partisan divide.

The Pew Research Center survey, conducted June 5-11 among 5,115 members of the Center's nationally representative American Trends Panel, finds wide differences in perceptions of most national problems.

Inflation remains the top concern for Republicans and Republican-leaning independents, with $77 \%$ saying it is a very big problem. The state of moral values, illegal immigration and the budget deficit also are seen as top problems by at least two-thirds of Republicans.

For Democrats and Democratic leaners, gun violence is the top concern, with about eight-in-ten

Partisan differences in assessments of many national problems, but both Republicans and Democrats see the ability of the parties to work together as a problem
$\%$ who say each of the following is a very big problem in the country today

Source: Survey of U.S. adults conducted June 5-11, 2023.
PEW RESEARCH CENTER
(81\%) saying it is a very big problem. The affordability of health care ranks second ( $73 \%$ say this).

Democrats are more than four times as likely as Republicans to say that climate change is a very big problem in the country ( $64 \%$ vs. $14 \%$ ). Democrats are also much more likely to say gun violence and racism are very big problems.

By contrast, Republicans are more than twice as likely as Democrats to say that illegal immigration is a very big problem ( $70 \%$ vs. $25 \%$ ). They are also about 30 percentage points more likely than Democrats to say that the state of moral values and the budget deficit are very big problems.

Among the other findings from the new survey:

## Most Americans expect the budget deficit to

 grow larger. The share of Americans who rate the budget deficit as a very big national problem has risen modestly since last year, from $51 \%$ to $56 \%$.Relatively few Americans expect the deficit to be lower in coming years: 70\% say that, in about five years, it will be larger than it is today; $18 \%$ expect it to be about the same size as it is today, while just $11 \%$ say it will be smaller.

## 7 in 10 Americans expect the yearly deficit will grow in the next 5 years

## Democrats have sizable advantages on climate,

 health care policy; Republicans lead on economy, crime, immigration. The public is more likely to say they agree with the Democratic Party on a number of issues, including abortion policy, health care policy and climate change policy.However, the Republican Party holds a 12-point advantage on economic policy: $42 \%$ say they agree with the GOP, $30 \%$ say they agree with the Democratic Party. The GOP holds similar leads on crime and immigration.

Biden job approval little changed. Currently, $35 \%$ of Americans approve of President Joe Biden's job performance, while 62\% disapprove. Biden's job approval has changed little in the past year. The survey also finds low job ratings for House Speaker Kevin McCarthy (34\% approve) and Senate Majority Leader Chuck Schumer (32\%).

Please visit detailed tables for a current view of Biden's approval rating among subgroups.

## Biden job rating remains under 40\%

PEW RESEARCH CENTER

## More Americans agree with GOP on economic policy, crime and immigration policy, but Democrats have edge on several other issues

About four-in-ten Americans (41\%) say they agree with the Democratic Party on climate change policy, while substantially fewer (27\%) agree with the GOP; nearly a third (31\%) say they agree with neither party.

The Democrats' advantage is similar on abortion policy and health care policy (12 points each).

Republicans hold advantages on policies addressing the economy ( 12 points), crime (10 points), immigration (10 points) and the budget deficit (8 points).

Neither party has a significant edge on education policy, gun policy or foreign policy.

For the most part, the shares agreeing with each party on issues has not changed much over the past year.

However, the GOP's 10-point advantage on immigration policy represents a shift since last July, when roughly equal shares of Americans say they agreed with each party ( $38 \%$ agree with GOP, $37 \%$ agree with Democrats).

In addition, while Democrats hold an 8-point advantage on policies affecting LGBT people

## GOP holds edge on economy, crime and immigration policy; Democrats have large advantages on climate change, abortion and health care policy

Note: No answer responses not shown.
Source: Survey of U.S. adults conducted June 5-11, 2023.
PEW RESEARCH CENTER
( $37 \%$ agree with the Democratic Party, $29 \%$ with the GOP and $33 \%$ with neither party), this is narrower than Democrats' 20-point lead last July.

## Top problems facing the country

Majorities of Americans say 8 of the 16 issues included on the survey are "very big problems" facing the country. These range from economic concerns, such as inflation, affordability of health care and the budget deficit, to drug addiction, gun violence and violent crime.

Majorities also view the ability of Democrats and Republicans to work together (62\%) and the state of moral values (54\%) as very big national problems.

The share saying health care affordability is a very big problem is up 9 percentage points since May 2022, when $55 \%$ said this. The shares saying that gun violence and violent crime are very big problems have also increased since last year (by 9 percentage points and 5 points respectively).

Racism, domestic and international terrorism, unemployment, and the condition of infrastructure rate lower on the public's list of very big national problems. Still, for these and other issues asked about on the survey, majorities rate each as at least moderately big problems.

Inflation, health care affordability, partisan cooperation, drugs and violence lead public's list of top national problems

Note: No answer responses not shown.
Source: Survey of U.S. adults conducted June 5-11, 2023.
PEW RESEARCH CENTER

Older Americans remain more likely than younger Americans to say that a number of issues are very big problems in the country today. The starkest example of this is on illegal immigration: About two-thirds of adults ages 65 ( $65 \%$ ) and over say that illegal immigration is a very big problem today. Around two-in-ten (22\%) of adults under the age of 30 say the same.

However, this pattern is reversed on climate change. About half of adults ages 18-29 (48\%) say that it is a very big problem, while $38 \%$ of adults ages 65 and over (and a similar share of adults 30-64) say this.

## Younger adults are less likely than older people to view most issues as very big problems, with the exceptions of climate change, unemployment

\% who say each of the following is a very big problem in the country today

| Illegal immigration | $\begin{gathered} \text { Ages } 18-29 \\ \text { n } \quad 22 \end{gathered}$ | $\begin{gathered} 30-49 \\ 37 \\ 0 \end{gathered}$ | $\underbrace{50-64}_{6}{ }_{c}^{62} .$ | Total 47 |

PEW RESEARCH CENTER

## Job ratings for Joe Biden, Kevin McCarthy, Chuck Schumer

A majority of the public (62\%) say they disapprove of Joe Biden's job performance as president, with $41 \%$ who strongly disapprove. A much smaller share (35\%) say they approve of Biden's job performance, with only $17 \%$ who strongly approve.

Black adults are the only racial or ethnic group in which a majority says they approve of Biden's job in office (57\%). About half of Asian adults (51\%) and six-in-ten Hispanic adults say they disapprove of Biden's job performance.

Two-thirds of White adults (67\%) say they disapprove of Biden's job performance, including half who strongly disapprove.

While majorities across all age groups disapprove of Biden's job performance, the share saying they strongly disapprove is much higher among adults ages 65 and over (47\%) than those under 30 (34\%).

Roughly two-thirds of
Democrats and Democraticleaning independents (65\%) approve of Biden's job

## More Americans strongly disapprove of Biden than strongly approve

\% who say they __ of the way Biden is handling his job as president

*Estimates for Asian adults are representative of English speakers only. Note: White, Black and Asian adults include those who report being only one race and are not Hispanic. Hispanics are of any race. No answer responses not shown.
Source: Survey of U.S. adults conducted June 5-11, 2023.
PEW RESEARCH CENTER
performance, with a third strongly approving. An overwhelming majority of Republicans and Republican leaners disapprove (92\%); nearly three-quarters (73\%) strongly disapprove.

Please visit detailed tables for Biden's approval rating among additional subgroups.

The job ratings for House Speaker Kevin McCarthy (34\% approve) and Senate Majority Leader Chuck Schumer ( $32 \%$ approve) are comparable to Biden's. Both congressional leaders get fairly mixed ratings from members of their own party and largely negative ratings from the opposing party.

## Majorities disapprove of how McCarthy, Schumer are handling their jobs

$\%$ who ___ of the way Kevin McCarthy is handling his job as speaker of the House

\% who $\qquad$ of the way Chuck Schumer is handling his job as Senate majority leader

Note: No answer responses not shown.

## Methodology

## The American Trends Panel survey methodology

## Overview

The American Trends Panel (ATP), created by Pew Research Center, is a nationally representative panel of randomly selected U.S. adults. Panelists participate via self-administered web surveys. Panelists who do not have internet access at home are provided with a tablet and wireless internet connection. Interviews are conducted in both English and Spanish. The panel is being managed by Ipsos.

Data in this report is drawn from ATP Wave 129, conducted from June 5 to June 11, 2023, and includes an oversample of Hispanic men, non-Hispanic Black men, and non-Hispanic Asian adults in order to provide more precise estimates of the opinions and experiences of these smaller demographic subgroups. These oversampled groups are weighted back to reflect their correct proportions in the population. A total of 5,115 panelists responded out of 5,865 who were sampled, for a response rate of $87 \%$. The cumulative response rate accounting for nonresponse to the recruitment surveys and attrition is $3 \%$. The break-off rate among panelists who logged on to the survey and completed at least one item is $1 \%$. The margin of sampling error for the full sample of 5,115 respondents is plus or minus 1.7 percentage points.

## Panel recruitment

The ATP was created in 2014, with the first cohort of panelists invited to join the panel at the end of a large, national, landline and cellphone random-digit-dial survey that was conducted in both English and Spanish. Two additional recruitments were conducted using the same method in 2015 and 2017, respectively. Across these three surveys, a total of 19,718 adults were invited to

## American Trends Panel recruitment surveys

| Recruitment dates | Mode | Invited | Joined | Active panelists remaining |
| :---: | :---: | :---: | :---: | :---: |
| Jan. 23 to March 16, 2014 | Landline/ cell RDD | 9,809 | 5,338 | 1,498 |

| Aug. 19 to Nov. 30, 2019 | ABS | 5,900 | 4,720 | 1,465 |
| June 1 to July 19, 2020; <br> Feb. 10 to March 31, 2021 | ABS | 3,197 | 2,812 | 1,541 |
| May 29 to July 7, 2021; <br> Sept. 16 to Nov. 1, 2021 | ABS | 1,329 | 1,162 | 785 |
| May 24 to Sept. 29, 2022 | ABS | 3,354 | 2,869 | 1,690 |
|  | Total | 42,894 | 30,283 | 12,402 |

Note: RDD is random-digit dial; ABS is address-based sampling. Approximately once per year, panelists who have not participated in multiple consecutive waves or who did not complete an annual profiling survey are removed from the panel. Panelists also become inactive if they ask to be removed from the panel.

PEW RESEARCH CENTER
join the ATP, of whom 9,942 (50\%) agreed to participate.

In August 2018, the ATP switched from telephone to address-based recruitment. Invitations were sent to a stratified, random sample of households selected from the U.S. Postal Service's Delivery Sequence File. Sampled households receive mailings asking a randomly selected adult to complete a survey online. A question at the end of the survey asks if the respondent is willing to join the ATP. In 2020 and 2021 another stage was added to the recruitment. Households that did not respond to the online survey were sent a paper version of the questionnaire, $\$ 5$ and a postage-paid return envelope. A subset of the adults who returned the paper version of the survey were invited to join the ATP. This subset of adults received a follow-up mailing with a $\$ 10$ pre-incentive and invitation to join the ATP.

Across the five address-based recruitments, a total of 23,176 adults were invited to join the ATP, of whom 20,341 agreed to join the panel and completed an initial profile survey. In each household, one adult was selected and asked to go online to complete a survey, at the end of which they were invited to join the panel. Of the 30,283 individuals who have ever joined the ATP, 12,402 remained active panelists and continued to receive survey invitations at the time this survey was conducted.

The U.S. Postal Service's Delivery Sequence File has been estimated to cover as much as $98 \%$ of the population, although some studies suggest that the coverage could be in the low $90 \%$ range. ${ }^{1}$ The American Trends Panel never uses breakout routers or chains that direct respondents to additional surveys.

## Sample design

The overall target population for this survey was non-institutionalized persons ages 18 and older living in the U.S., including Alaska and Hawaii. It featured a stratified random sample from the ATP in which Hispanic men, non-Hispanic Black men, and non-Hispanic Asian adults were selected with certainty. The remaining panelists were sampled at rates designed to ensure that the share of respondents in each stratum is proportional to its share of the U.S. adult population to the greatest extent possible. Respondent weights are adjusted to account for differential probabilities of selection as described in the Weighting section below.

## Questionnaire development and testing

The questionnaire was developed by Pew Research Center in consultation with Ipsos. The web program was rigorously tested on both PC and mobile devices by the Ipsos project management

[^0]team and Pew Research Center researchers. The Ipsos project management team also populated test data that was analyzed in SPSS to ensure the logic and randomizations were working as intended before launching the survey.

## Incentives

All respondents were offered a post-paid incentive for their participation. Respondents could choose to receive the post-paid incentive in the form of a check or a gift code to Amazon.com or could choose to decline the incentive. Incentive amounts ranged from $\$ 5$ to $\$ 20$ depending on whether the respondent belongs to a part of the population that is harder or easier to reach. Differential incentive amounts were designed to increase panel survey participation among groups that traditionally have low survey response propensities.

## Data collection protocol

The data collection field period for this survey was June 5 to June 11, 2023. Postcard notifications were mailed to all ATP panelists with a known residential address on June 5.

Invitations were sent out in two separate launches: soft launch and full launch. Sixty panelists were included in the soft launch, which began with an initial invitation sent on June 5. The ATP panelists chosen for the initial soft launch were known responders who had completed previous ATP surveys within one day of receiving their invitation. All remaining English- and Spanishspeaking sampled panelists were included in the full launch and were sent an invitation on June 6.

All panelists with an email address received an email invitation and up to two email reminders if they did not respond to the survey. All ATP panelists who consented to SMS messages received an SMS invitation and up to two SMS reminders.

## Invitation and reminder dates, ATP Wave 125

|  | Soft launch | Full launch |
| :--- | :--- | :--- |
| Initial invitation | June 5, 2023 | June 6, 2023 |
| First reminder | June 8, 2023 | June 8, 2023 |
| Final reminder | June 10, 2023 | June 10, 2023 |

PEW RESEARCH CENTER

## Data quality checks

To ensure high-quality data, the Center's researchers performed data quality checks to identify any respondents showing clear patterns of satisficing. This includes checking for very high rates of leaving questions blank, as well as always selecting the first or last answer presented. As a result of this checking, six ATP respondents were removed from the survey dataset prior to weighting and analysis.

## Weighting

The ATP data is weighted in a multistep process that accounts for multiple stages of sampling and nonresponse that occur at different points in the survey process. First, each panelist begins with a base weight that reflects their probability of selection for their initial recruitment survey. These weights are then rescaled and adjusted to account for changes in the design of ATP recruitment surveys from year to year. Finally, the weights are calibrated to align with the population benchmarks in the accompanying table to correct for nonresponse to recruitment surveys and panel attrition. If only a subsample of panelists was invited to participate in the wave, this weight is adjusted to account for any differential probabilities of selection.

## American Trends Panel weighting dimensions

| Variable | Benchmark source |
| :---: | :---: |
| Age (detailed) | 2021 American Community Survey (ACS) |
| Age $x$ Gender |  |
| Education x Gender |  |
| Education $\times$ Age |  |
| Race/Ethnicity x Education |  |
| Born inside vs. outside the U.S. among Hispanics and Asian Americans |  |
| Years lived in the U.S. |  |
| Census region x Metro/Non-metro | 2021 CPS March Supplement |
| Volunteerism | 2021 CPS Volunteering \& Civic Life Supplement |
| Voter registration | 2018 CPS Voting and Registration Supplement |
| Party affiliation | 2022 National Public Opinion |
| Frequency of internet use | Reference Survey (NPORS) |
| Religious affiliation |  |
| Additional weighting dimensions applied within Black adults |  |
| Age | 2021 American Community Survey (ACS) |
| Gender |  |
| Education Hispanic ethnicity |  |
|  |  |
| Voter registration | 2018 CPS Voting and Registration Supplement |
| Party affiliation | 2022 National Public Opinion |
| Religious affiliation | Reference Survey (NPORS) |

Note: Estimates from the ACS are based on non-institutionalized adults. Voter registration is calculated using procedures from Hur, Achen (2013) and rescaled to include the total U.S. adult population.
PEW RESEARCH CENTER

Among the panelists who completed the survey, this weight is then calibrated again to align with the population benchmarks identified in the accompanying table and trimmed at the 1st and 99th
percentiles to reduce the loss in precision stemming from variance in the weights. Sampling errors and tests of statistical significance take into account the effect of weighting.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the $95 \%$ level of confidence for different groups in the survey.

Sample sizes and margins of error, ATP Wave 129

| Group | Unweighted <br> sample size <br> Total sample <br> Half form | Weighted \% | Plus or minus ... <br> 1.7 percentage points |
| :--- | :---: | :---: | :---: |
| Rep/Lean Rep 2,548 | 46 | 2.5 percentage points |  |
| Half form | 2,279 | 4.5 percentage points |  |
| At least 1,137 | 2,644 | 47 | 3.5 percentage points |
| Dem/Lean Dem | At least 1,318 |  | 2.4 percentage points |
| Half form |  |  | 3.5 percentage points |

Note: This survey includes oversamples of Hispanic men, non-Hispanic Black men, and non-Hispanic Asian adults.
Unweighted sample sizes do not account for the sample design or weighting and do not describe a group's contribution to weighted estimates. See the Sample design and Weighting sections above for details.
PEW RESEARCH CENTER

Sample sizes and sampling errors for other subgroups are available upon request. In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

## Dispositions and response rates

[^5]
[^0]:    ${ }^{1}$ AAPOR Task Force on Address-based Sampling. 2016. "AAPOR Report: Address-based Sampling."

[^1]:    1 The W24.5 Mode Study survey was administered by web and phone. Results reported here are from web mode only.

[^2]:    3
    In December 2018, question asked about "The condition of roads bridges and public transportation across the country."

[^3]:    4 In 2016, each PTYISSUE item was asked on a separate screen; question was programmed: "Would you say you agree with the [RANDOMIZE TO MATCH RESPONSE OPTIONS: Republican Party or the Democratic Party] on the following policy area?" with response options listed in order that they appeared in question stem

[^4]:    5
    Previous versions of this question were worded slightly differently. For surveys conducted 2021 and earlier, the question was worded "How would you rate the job the U.S. government is doing dealing with the increased number of people seeking asylum at the U.S. border with Mexico?"
    6 Previous versions of this question were worded slightly differently. In 2019, the item was worded, "To reduce the number of people coming to the U.S. to seek asylum." In 2021 the item was worded, "Reducing the number of people coming to the U.S. to seek asylum." Similar changes were made to all items

[^5]:    7 PARTY and PARTYLN asked in a prior survey.
