

Topline questionnaire

Pew Research Center
Spring 2025 Global Attitudes Survey
March 5, 2026 Release

Methodological notes:

- Survey results are based on national samples. For further details on sample designs, refer to the Methodology section and our [international survey methods database](#).
- The data for the United States comes from two waves of the American Trends Panel (ATP). The question about homosexuality comes from ATP Wave 170, while all other questions come from ATP Wave 166.¹
- In Q17a-Q17i, response options were “Morally acceptable,” “Morally unacceptable” and “Not a moral issue.” In the U.S., the response option was “Morally wrong” instead of “Morally unacceptable.”
- In Q17a-Q17i, the volunteered response “Depends on situation” was not included in Australia and the U.S.
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers.
- We have changed our survey mode in several countries at certain points. For some mode shifts, we may provide trends from another mode for comparison in separate topline tables. The extent of the mode differences varies across questions; while there are negligible differences on some questions, others have more pronounced differences. Caution should be taken when comparing across modes. Some of these changes include:
 - Surveys in the U.S. and Australia which are now conducted primarily online, rather than by telephone.
 - Surveys in Hungary and Poland which are now conducted by telephone, rather than face-to-face.

¹ The survey sample for the question about homosexuality on ATP Wave 170 included 183 interviews with Jews, with an effective sample size of 66 and a 95% confidence level margin of error of plus or minus 12.1 percentage points. This margin of error conservatively assumes a reported percentage of 50%.

- Since 2020, the Italy survey has been conducted by telephone; surveys were conducted face-to-face in 2002 and 2007-2019.
- Since 2021, the Greece survey has been conducted by telephone; all prior surveys in Greece were conducted face-to-face.
- Not all questions included in the Spring 2025 Global Attitudes Survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.

		Q16. Generally, how would you rate the morality and ethics of (survey country nationality)s – are their morals very good, somewhat good, somewhat bad or very bad?							Total	N=
		TOTAL Good	TOTAL Bad	Very good	Somewhat good	Somewhat bad	Very bad	DK/Refused
