

Appendix D: Summary of results

Government restrictions on religion

To assess the level of restrictions on religion by governments around the world, Pew Research Center selected the following 20 questions for the Government Restrictions Index (GRI). Center staff then combed through 19 published sources of information – including reports by the U.S. State Department, the United Nations and various nongovernmental organizations – to answer the questions on a country-by-country basis. (For more details, refer to the [Methodology](#).)

This summary shows the questions, followed by various possible answers, and the number and percentage of countries that fell into each category, according to the multiple sources analyzed by the Center. For example, on Question No. 5 – “Is public preaching by religious groups limited by any level of government?” – the study found that for the latest year, ending on Dec. 31, 2023, 113 countries and territories (57% of all studied) had no reported limits on preaching; 36 countries (18%) had limits on preaching for some religious groups; and another 49 countries (25%) had limits on preaching for all religious groups.

Additionally, the summary shows whether particular religious restrictions occurred during the previous year, ending Dec. 31, 2022, or in the study’s baseline year, ending in mid-2007. A total of 197 countries and territories are shown for the baseline year; South Sudan was coded for the first time in 2011, bringing the total to 198 countries and territories starting that year. To see how each country scored on each question, refer to “[Appendix E: Results by country](#)” online.

When comparing these results with Pew Research Center’s previous reports, readers should keep in mind that reports published before 2011 showed the number of countries in which particular religious restrictions occurred at any time during two overlapping periods: July 1, 2006-June 30, 2008, and July 1, 2007-June 30, 2009. Because this report presents data on an annual basis, the number of incidents for a single year may be smaller than when two years were taken into account.

Some differences from year to year might not be as significant as they appear due to minor changes in coding procedures and changes in the amount of information available between years. For example, sources for the most recent period studied sometimes had less information on incidents in a country than sources previously had reported. Such additional information may reflect either an actual decrease in restrictions in a country, streamlined reporting for that country, or both. (For more details, refer to the [Methodology](#).)

Percentages may not add to 100 due to rounding.

GRI.Q.1

Does the constitution, or law that functions in the place of a constitution (basic law), specifically provide for “freedom of religion” or include language used in Article 18 of the United Nations Universal Declaration of Human Rights?¹

Note: This report corrects the way constitutions were coded for 10 countries: Cameroon, Costa Rica, the Dominican Republic, Fiji, Iran, Jamaica, Kenya, Mexico, Mozambique and Uruguay. The corrections were applied to all applicable previous years to ensure consistency, and the updates resulted in changes to distribution of the GRI.Q.1 and GRI.Q.2 variables in various years. Users of the data should note this update when comparing these results with those printed in previous reports.

¹ Article 18 states: “Everyone has the right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance.”

Social hostilities involving religion

To assess the level of social hostilities involving religion around the world, Pew Research Center used the following 13 questions for the Social Hostilities Index (SHI). Center staff then combed through 19 published sources of information – including reports by the U.S. State Department, the United Nations and various nongovernmental organizations – to answer the questions on a country-by-country basis. (For more details, refer to the [Methodology](#).)

This summary shows the questions, followed by various possible answers, and the number and percentage of countries that fell into each category, according to the multiple sources analyzed by the Center. For example, on Question No. 12 – “Were there incidents of hostility over proselytizing?” – the study found that for the latest year, ending on Dec. 31, 2023, 171 countries and territories (86% of all studied) had no reported incidents of hostility over proselytizing; 17 countries (9%) had incidents that fell short of physical violence; and 10 countries (5%) had incidents involving violence.

Additionally, the summary shows whether particular religious hostilities occurred during the previous year, ending Dec. 31, 2022, or in the study’s baseline year, ending in mid-2007. A total of 197 countries and territories are shown for the baseline year; South Sudan was coded for the first time in 2011, bringing the total to 198 countries and territories starting that year. To see how each country scored on each question, refer to “[Appendix E: Results by country](#)” online.

When comparing these results with Pew Research Center’s previous reports, readers should keep in mind that previous reports showed the number of countries in which particular religious hostilities occurred at any time during two overlapping periods: July 1, 2006-June 30, 2008, and July 1, 2007-June 30, 2009. Because this report presents data on an annual basis, the number of incidents for a single year may be smaller than when two years were taken into account.

Some differences from year to year might not be as significant as they appear due to minor changes in coding procedures and changes in the amount of information available between years. For example, sources for the most recent period studied sometimes had more information on incidents in a country than sources previously had reported. Such additional information may reflect either an actual increase in hostilities in a country, improved reporting for that country, or both. (For more details, refer to the [Methodology](#).)

Percentages may not add to 100 due to rounding.

SHI.Q.1.a

Were there crimes, malicious acts or violence motivated by religious hatred or bias?

	<i>baseline year, ending JUN 2007</i>		<i>previous year, ending DEC 2022</i>		<i>latest year, ending DEC 2023</i>	
	NUMBER OF COUNTRIES	% OF COUNTRIES	NUMBER OF COUNTRIES	% OF COUNTRIES	NUMBER OF COUNTRIES	% OF COUNTRIES

Deaths	25	13	37	19	39	20
	197	100	198	100	198	100

* This line represents the number or percentage of countries in which at least one of the following hostilities occurred. Each country's score for each type of religious hatred or bias is available in SHI.Q.1a-f in Appendix F: Results by country (online). Note: This is a summary table that captures the types of religious hatred or bias. Nested categories add to more than total because countries can have multiple types of hostilities.

SHI.Q.1.b

How many different types of crimes, malicious acts or violence motivated by religious hatred or bias occurred? The six different types considered include: harassment/intimidation, property damage, detentions/abductions, displacement from homes, physical assaults and killings.

	<i>baseline year, ending JUN 2007</i>		<i>previous year, ending DEC 2022</i>		<i>latest year, ending DEC 2023</i>	
	NUMBER OF COUNTRIES	% OF COUNTRIES	NUMBER OF COUNTRIES	% OF COUNTRIES	NUMBER OF COUNTRIES	% OF COUNTRIES

Yes	16	8	11	6	13	7
	197	100	198	100	198	100

Note: Sectarian or communal violence involves two or more religious groups facing off in repeated clashes.

SHI.Q.4*Were religion-related terrorist groups active in the country?*

	<i>baseline year, ending JUN 2007</i>		<i>previous year, ending DEC 2022</i>		<i>latest year, ending DEC 2023</i>	
	NUMBER OF COUNTRIES	% OF COUNTRIES	NUMBER OF COUNTRIES	% OF COUNTRIES	NUMBER OF COUNTRIES	% OF COUNTRIES
No	137	70%	150	76%	143	72%
Yes	60	30	48	24	55	28
Yes, but their activity was limited to recruitment and fundraising	43	22	24	12	24	12
Yes, with violence that resulted in some casualties (1-9 injuries or deaths)	7	4	3	2	5	3
Yes, with violence that resulted in multiple casualties (10-50 injuries or deaths)	2	1	3	2	1	1
Yes, with violence that resulted in many casualties (more than 50 injuries or deaths)	8	4	18	9	25	13
	197	100	198	100	198	100

Note: Religion-related terrorism is defined as politically motivated violence against noncombatants by subnational groups or clandestine agents with a religious justification or intent. For SHI.Q.4, the differences between the coding periods may not be as significant as they appear due to minor changes in coding procedures. Refer to the Methodology for more information.

SHI.Q.5

Was there a religion-related war or armed conflict in the country?

	<i>baseline year, ending JUN 2007</i>		<i>previous year, ending DEC 2022</i>		<i>latest year, ending DEC 2023</i>
