Economy, Afghanistan Top News Interest, Coverage

Americans focused most closely last week on news about the nation’s struggling economy and President Obama’s plans to draw down U.S. troops in Afghanistan.

Two-in-ten (20%) say the economy was their top story, while 16% say they followed the discussions in Washington about troop levels in Afghanistan more closely than any other top story, according to the latest weekly News Interest Index survey conducted June 23-26 among 1,005 adults by the Pew Research Center for the People & the Press.

News Interest vs. News Coverage

	News Interest	News Coverage
Economy	20	16
Troops in Afghanistan	16	14
Wildfires in West, South	11	1
2012 elections	8	9
U.S. role in Libya	5	3
Wal-Mart ruling	4	2

News interest shows the percentage of people who say they followed this story most closely, Pew Research Center for the People & the Press, June 23-26, 2011. News coverage shows the percentage of news coverage devoted to each story, Pew Research Center’s Project for Excellence in Journalism, June 20-26, 2011.

Those two stories also topped news coverage last week, with the economy accounting for 16% of the newshole and Obama’s troop announcement accounting for 14%, [according to a separate analysis by the Pew Research Center’s Project for Excellence in Journalism \(PEJ\)](#). PEJ noted that the long-running war has received only modest coverage in recent years, though media attention generally increases when war developments – such as a shift in strategy or military leadership – take place in Washington.

Interest in Obama's new troop drawdown plan is consistent with interest in other recent developments in Afghanistan policy. Still, it is considerably lower than interest in the president's announcement on Dec. 1, 2009, that he would boost troop levels in Afghanistan.

Currently, 27% say they followed news about the debate over troop levels very closely. In early December of 2009, 43% said they followed news about Obama's decision to send more troops to the war zone very closely. At that point, coverage of the war and Obama's revamped strategy accounted for 27% of the newshole examined by PEJ, making it the week's top story.

Interest in News about Afghanistan Policy

<i>% following very closely</i>	<i>%</i>
Obama announces surge plans (12-09)	43
Debate over troop levels (11-09)	29
McChrystal resigning as commander (6-10)	28
Discussions about troop levels (6-11)	27
Decision to send 17,000 more troops (2-09)	27

PEW RESEARCH CENTER June 23-26, 2011.

The Week's News

Nearly four-in-ten Americans (37%) say they followed news about the economy very closely last week. That's little changed from recent weeks amid continuing signs that the recovery has slowed. Two-in-ten (20%) say this is the story they followed most closely.

While 27% say they followed discussions about Afghanistan troop levels very closely, interest in several other top stories was not far behind. About two-in-ten (21%) say they very closely followed news about continued wildfires in the West and South; this was the top story for 11%. News about the fires accounted for just 1% of national coverage measured by PEJ.

About two-in-ten (19%) say they followed news about the 2012 elections very closely, while 8% say this was their top story. Though most of the news has been about developments in the Republican field of presidential candidates, there is little difference among partisans in interest in this story. Election coverage accounted for 9% of the newshole.

A comparable 19% say they followed the debate over U.S. involvement in the conflict in Libya very closely; 5% say this was their top story. News about U.S. policy in Libya accounted for 3% of coverage.

Just 13% say they followed news about the U.S. Supreme Court dismissing a sex-discrimination case against Wal-Mart very closely; 4% say this was the story they followed most closely. Men and women were just as likely to follow this news very closely.

News Interest

Which one story did you follow most closely?

PEW RESEARCH CENTER June 23-26, 2011.

These findings are based on the most recent installment of the weekly News Interest Index, an ongoing project of the Pew Research Center for the People & the Press. The index, building on the Center's longstanding research into public attentiveness to major news stories, examines news interest as it relates to the news media's coverage. The weekly survey is conducted in conjunction with The Project for Excellence in Journalism's News Coverage Index, which monitors the news reported by major newspaper, television, radio and online news outlets on an ongoing basis. In the most recent week, data relating to news coverage were collected June 20-26, and survey data measuring public interest in the top news stories of the week were collected June 23-26 from a nationally representative sample of 1,005 adults.

About the News Interest Index

The *News Interest Index* is a weekly survey conducted by the Pew Research Center for the People & the Press aimed at gauging the public's interest in and reaction to major news events. This project has been undertaken in conjunction with the Project for Excellence in Journalism's *News Coverage Index*, an ongoing content analysis of the news. The News Coverage Index catalogues the news from top news organizations across five major sectors of the media: newspapers, network television, cable television, radio and the internet. Each week (from Monday through Sunday) PEJ compiles this data to identify the top stories for the week. (For more information about the Project for Excellence in Journalism's News Coverage Index, go to www.journalism.org.) The News Interest Index survey collects data from Thursday through Sunday to gauge public interest in the most covered stories of the week.

Results for this survey are based on telephone interviews conducted June 23-26, 2011, among a national sample of 1,005 adults 18 years of age or older living in the continental United States (672 respondents were interviewed on a landline telephone, and 333 were interviewed on a cell phone, including 142 who had no landline telephone). The survey was conducted by interviewers at Princeton Data Source under the direction of Princeton Survey Research Associates International. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International. Interviews were conducted in English. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older.

The combined landline and cell phone sample are weighted using an iterative technique that matches gender, age, education, race, Hispanic origin, region, and population density to parameters from the March 2010 Census Bureau's Current Population Survey. The sample is also weighted to match current patterns of telephone status based on extrapolations from the 2010 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size within the landline sample. Sampling errors and statistical tests of significance take into account the effect of weighting. The following table shows the sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Group	Sample Size	Plus or minus ...
Total sample	1,005	4.0 percentage points
Republicans	256	7.5 percentage points
Democrats	318	7.0 percentage points
Independents	339	6.5 percentage points

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.
